29

30 **Abstract**

31 High pathogenicity avian influenza (HPAI) has caused widespread sickness and
32 mortality in poultry and wildlife, especially since the emergence of a novel H5 virus
33 belonging to clade 2.3.4.4b in 2021. The ongoing panzootic caused by this lineage has
34 infected an unprecedented diversity of species across the globe. Here, we analyse
35 outbreak notifications of HPAI in wild birds to understand the impacts of species'
36 ecologies and phylogeny on HPAI notifications and predict host susceptibility to HPAI
37 H5N1 for Australia, as the only continent thus far unaffected by this virus. We found a
38 significant family-level phylogenetic signal in HPAI notifications in wild birds.

39 Furthermore, we found that adding ecological traits to this phylogenetic information
40 does not improve explanatory power of HPAI notifications. Using the family-level
41 phylogenies to predict HPAI H5N1 susceptibility in Australian birds, we predict that
42 families of Australian seabirds, shorebirds, and waterbirds will be most susceptible to
43 HPAI H5N1 once it arrives on the continent. Our results provide an empirical indication
44 of species susceptible to HPAI H5N1, with special reference to Australia, which can be
45 used in conjunction with conservation status and other species-specific information to
46 inform preparedness activities, monitoring, and response upon incursion.

51

52 **Introduction**

53 High pathogenicity avian influenza (HPAI) has wreaked havoc on poultry and wildlife for
54 decades, causing tremendous financial and conservation harm. Low pathogenicity
55 avian influenza (LPAI) viruses are often associated with wild waterfowl, and particularly
56 ducks, and have occasionally evolved into HPAI viruses following spill over events into
57 poultry [1]. HPAI has particularly surged into focus since 2021 due to the emergence of
58 a H5N1 virus belonging to clade 2.3.4.4b that is referred to as HPAI H5N1 [2, 3]. The
59 current panzootic caused by this HPAI H5N1 virus is unprecedented in scale, having
60 spread to every region except Oceania (including Australia and New Zealand) and
61 causing large scale mortalities in poultry and wild birds, increasingly also spilling over
62 into mammalian wildlife and livestock [3-5]. HPAI H5N1 has led to mass mortality
63 events in wildlife and cause for conservation concern in some impacted species. For
64 example, HPAI H5N1 is associated with 60% reductions in both northern gannets in the
65 UK [6] and Dalmatian pelicans in Greece [7], and a 91% mortality rate of Caspian terns
66 in Kazakhstan [8]. At the same time, the spread of the virus is also increasingly
67 facilitated by some of these wild bird species. The HPAI H5N1 panzootic is set apart by
68 increased host promiscuity, no longer being highly adapted specifically to poultry (e.g.
69 [9]) and spreading geographically via far-ranging waterfowl, seabirds, and potentially
70 other wild bird species [10, 11]. As such, understanding the new disease landscape for
71 this virus, and notably what species are vulnerable to infection and may play a role in
72 the maintenance and dispersal of the virus is of paramount importance, both to
73 understand why HPAI H5N1 has had such drastic impacts on diverse wildlife and to be
74 able to sketch this panzootic's future trajectory.

75

76 HPAI H5N1 has now been detected in over 400 different avian species during the
77 current panzootic [5, 12]. Presence of LPAI, from which HPAI evolves, has a strong
78 phylogenetic signal in wild birds [13], meaning avian influenza is more prevalent in
79 certain closely-related clusters of species. Notably, there is phylogenetic signal of LPAI
80 across different orders (with major reservoirs in waterfowl [Anseriformes], followed by
81 shorebirds [Charadriiformes]), but with distinct variation remaining across families and
82 species within orders [13]. However, how well that phylogenetic signal is preserved in
83 the current panzootic is not well understood, and is potentially very different given the

84 diversity of birds currently impacted. The apparent expansion of hosts from LPAI to the
85 current HPAI H5N1 impacts the predictability of its epidemiology, and notably our
86 understanding of which species may be severely impacted by HPAI H5N1 as it spreads
87 across the world.

88

89 Transmission of HPAI H5N1 within and between species might also depend on an
90 individual's interaction with the transmission pathway. Avian influenza transmission
91 occurs through faecal-oral pathways, which can take place directly through interaction
92 with faecal matter or indirectly through interaction with contaminated water, where the
93 virus can persist for a long time [14, 15]. Colony breeding, and specific colony traits
94 such as distance between nests, have also been implicated in HPAI H5N1 spread [14,
95 16]. Based on infection patterns in predatory birds and mammals, HPAI H5N1 is also
96 capable of spreading via consumption of infected birds [1, 17] and potentially via
97 kleptoparasitism [18]. These distinct transmission pathways present particularly "risky
98 ecologies" for birds to have, in terms of likelihood of encountering the virus: association
99 with water, likely contact with faecal matter, dense flocking behaviour, and scavenging
100 or predation are all likely to increase the probability of a species encountering HPAI
101 H5N1. However, empirical testing of these potentially "risky ecologies" across known
102 cases of H5N1 are lacking (but see [16]). Improved understanding of how ecological
103 traits can increase disease exposure will furthermore improve our predictive power of
104 which species are likely to be impacted once HPAI H5N1 reaches the last region it
105 hasn't infected, Oceania (including Australia and New Zealand), and other more
106 isolated parts of the world that have so far escaped exposure to the virus.

107

108 In this paper, we evaluate the influence of ecological traits and phylogenetic
109 relationships on species' HPAI notifications and use this to predict susceptibility to
110 HPAI of naïve, Australian species. We analysed notifications of HPAI in wild birds
111 reported to the World Organisation of Animal Health (WOAH) across the world since the
112 start of the panzootic. Using phylogenetic generalised linear mixed models, we
113 modelled notifications of HPAI H5N1 in wild birds against multiple predictors: a family-
114 level phylogeny and ecological traits that might influence disease exposure (habitat,
115 diet, and congregation behaviour). Following model selection, we predict HPAI H5N1

116 susceptibility in Australian birds, as the last remaining continent not yet affected by the
117 current panzootic. Here, our measure of “susceptibility” is the predicted number of
118 HPAI notifications, which is modelled based on HPAI notifications to WOAH.

119

120 **Methods**

121 To model factors predicting HPAI H5N1 notifications in wild birds, we used the WOAH
122 World Animal Health Information System (WAHIS) database of HPAI notifications. An
123 HPAI notification in the WAHIS database can represent a) a notification of an HPAI
124 detection in an environmental sample from the recorded wild bird species, b) a
125 notification of an HPAI detection in the species, but where the individual had no obvious
126 or reported clinical signs of sickness/death, and c) a notification of HPAI in sick and
127 dead wild birds of the reported species. While underreporting of outbreaks is likely an
128 issue with this database [5], it still provides a minimum indication of HPAI notifications
129 because each notification may represent a single bird or multiple birds from a single
130 species. The database was accessed on 06/01/2025 and filtered to only include
131 notifications of outbreaks reported in wild birds of known species since October 2021.
132 In 99% of the cases, the serotype of the HPAI notification was evaluated and
133 established to be HPAI H5. We therefore assume that the majority (if not all)
134 notifications used in our study relate to HPAI H5N1. It should be noted that WOAH bears
135 no responsibility for the integrity or accuracy of the data, including but not limited to any
136 deletion, manipulation, or reformatting of data that may have occurred beyond its
137 control.

138

139 Because of the links between disease transmission pathways and ecological traits like
140 aquatic lifestyles, certain feeding ecologies, and tendency to congregate, we modelled
141 how ecological traits might influence HPAI H5N1 notifications in wild birds. Initial
142 ecological categorisations of habitat and trophic niche were obtained from Avonet [19].
143 In our analyses, we wanted to avoid categorisations that were too narrow (e.g.
144 differentiating between frugivores and granivores) or perhaps arbitrarily differentiated
145 between species with otherwise similar ecologies (e.g. denominating the Common
146 Merganser as inhabiting “riverine” habitat, but other mergansers as “wetland”).
147 Therefore, we modified some habitat and trophic niche categorisations based on

148 information in Birds of the World [20], and broadened the groupings. We thus had three
149 categories for habitat: Terrestrial, Freshwater, and Coastal/Marine, and three categories
150 for diet: Predators (including scavengers, vertebrate and invertebrate predators), Plant-
151 based diets (including aquatic and terrestrial plant material), and Omnivores (including
152 any species that were both predators and plant-based feeders). We used BirdLife's list
153 of congregating birds as our initial starting points for whether species were known to
154 congregate or not (Y/N), and supplemented this with information from Birds of the
155 World [20]. For a full list of species and our ultimate ecological categorisation for these
156 species, see Supporting Information Table S1.

157

158 To predict HPAI susceptibility in Australian birds in the event of HPAI H5N1 incursion
159 into Australia, we used the BirdLife Working List of Australian Birds dataset
160 (<https://birddata.birdlife.org.au/whats-in-a-name>) to generate a list of Australian bird
161 species. The list was refined to exclude rare vagrants and uncommon non-native
162 species. Similar to how we treated the WAHIS dataset, we used Avonet's and BirdLife's
163 ecological data on habitat, diet, and congregation as starting points, with refinement
164 and broadening of categories to generate matching ecological traits. The full list of
165 Australian birds we used, their ecological categorisations, and their IUCN status can be
166 found in Supporting Information Table S2.

167

168 *Statistical analyses*

169 All analyses were conducted in R version 4.4.0. [21].

170

171 To model HPAI H5N1 notifications in birds, we used a phylogenetic generalised linear
172 mixed model (GLMM) in the 'brms' package [22]. We used a Poisson distribution of the
173 number of HPAI notifications, modelled against the phylogeny. For the phylogeny, we
174 used the family-level phylogeny from [23]. We used family, rather than species-level
175 phylogeny to avoid reporting biases for more common species, when species in the
176 same family are likely to share similar ecological traits and immune system
177 architecture. This was especially relevant for our next step, outlined below, wherein we
178 used the model of HPAI notifications to predict HPAI H5N1 susceptibility in Australian
179 species (we wanted to avoid drastically uneven outbreak notification estimates for

180 Australian species in the same family, but where some species were closely related to a
181 species with high HPAI notifications). We built upon the phylogenetic GLMM to include
182 the ecological traits of species: habitat (N = 3 categories), diet (N = 3 categories), and
183 whether the species is known to congregate (Y/N). We fitted three models that had one
184 single ecological predictor (habitat, diet, or congregation), and then an additional model
185 that included all 3 ecological predictors. We evaluated model fit of these against the
186 null, phylogeny-only model using leave-one-out (LOO) cross validation information
187 criterion (IC), which is interpreted similarly to AIC where low values are associated with
188 better models.

189

190 The next step in our analyses was to predict which Australian species may be
191 susceptible to HPAI H5N1 once it arrives in Australia, based on patterns of HPAI H5N1
192 notifications elsewhere in the world. We used the HPAI notification data to predict
193 numbers of HPAI H5N1 notifications in Australian birds, and use this as our metric of
194 predicted susceptibility to HPAI H5N1. Most (~98%) of HPAI notifications in the WAHIS
195 database since October 2021 report deaths for species that have outbreak
196 notifications, which means that our predicted susceptibility to infection is also linked to
197 a species' likelihood of experiencing sickness and death. To predict susceptibility to
198 HPAI H5N1, we first added the Australian bird families to our above phylogeny [23], thus
199 resulting in a phylogeny with the families in the WAHIS database and the Australian
200 families. Using the 'castor' package [24], we predicted HPAI H5N1 notification likelihood
201 onto the Australian species. This was done using hidden state prediction via
202 phylogenetic independent contrasts, using the family-level phylogeny with both known
203 and unknown HPAI notifications (wherein known HPAI notifications were expressed as
204 an average per family). Through this, we retrieved predicted HPAI H5N1 notifications for
205 Australian bird families, which we interpreted as their predicted susceptibility to HPAI
206 H5N1.

207

208 Plots were made using 'ggtree' [25] and 'ggplot2' [26]. Lastly, we extracted IUCN Redlist
209 status for Australian species using the 'rredlist' package [27], to ascertain the
210 conservation status of any species predicted to be highly susceptible to HPAI H5N1 and

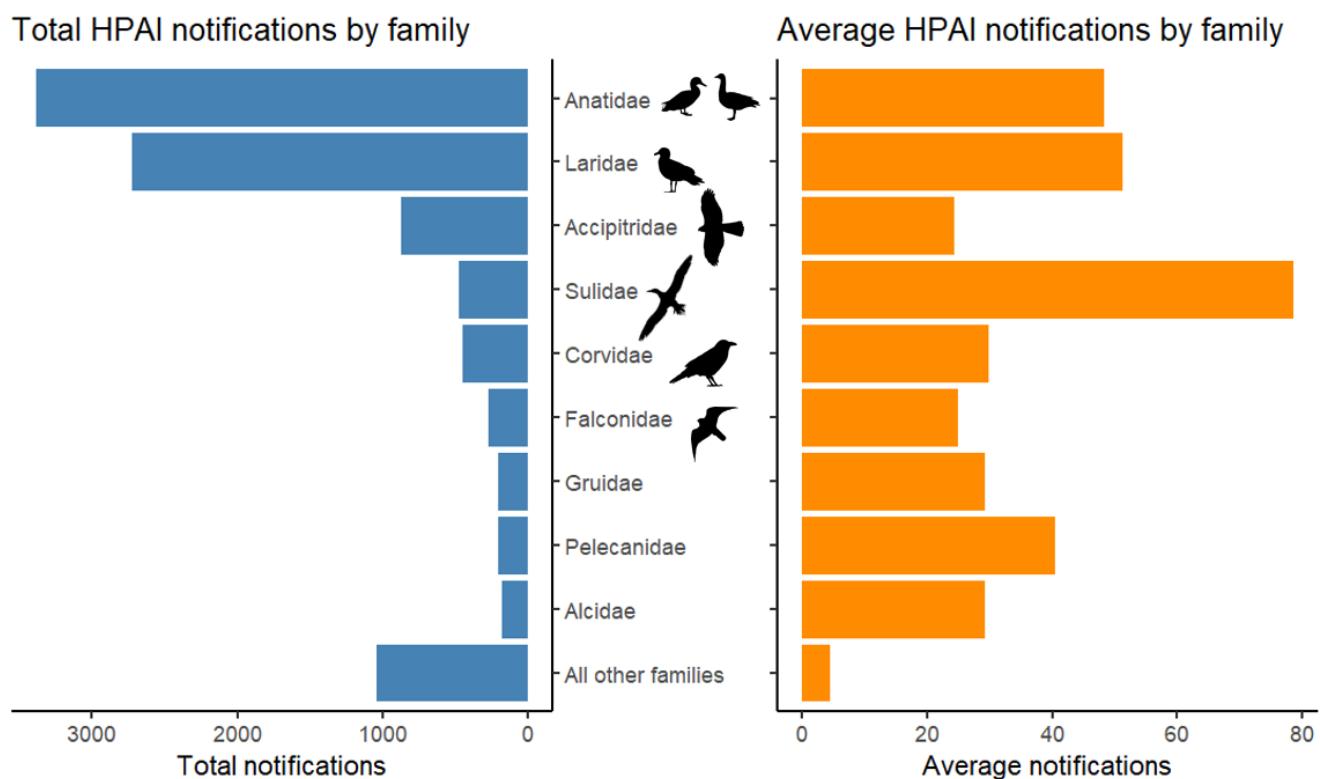

211 thus highlight species that may be at greater risk due to pre-existing vulnerabilities or
212 due to other reasons than vulnerability to HPAI H5N1.

213

214 Results

215 When analysing notifications of HPAI H5N1 in wild birds since October 2021 using the
216 phylogeny-only model, we found a statistically significant phylogenetic signal (Pagel's λ :
217 0.54, 95% CI: 0.04 – 0.84). There were predominantly high numbers of HPAI H5N1
218 notifications amongst Sulidae (gannets and boobies), Laridae (gulls, terns, and
219 noddies), and Anatidae (ducks, geese, and swans). To a lesser extent, other seabirds
220 (like Pelecanidae [pelicans] and Alcidae [auks]), crows and ravens (Corvidae), and birds
221 of prey (like Falconidae and Accipitridae) also had higher numbers of HPAI H5N1
222 notifications (Figure 1).

223

224

225 *Figure 1. HPAI H5N1 notifications in wild birds 2021 – 2024. The left panel shows total*
226 *HPAI H5N1 notifications made to WOAH WAHIS per family, while the right panel shows*
227 *average HPAI H5N1 notifications per family. A few key families are highlighted by*
228 *inclusion of bird icons from phylopic.org, going down from the top: Anatidae, Laridae,*
229 *Accipitridae, Sulidae, Corvidae, and Falconidae.*

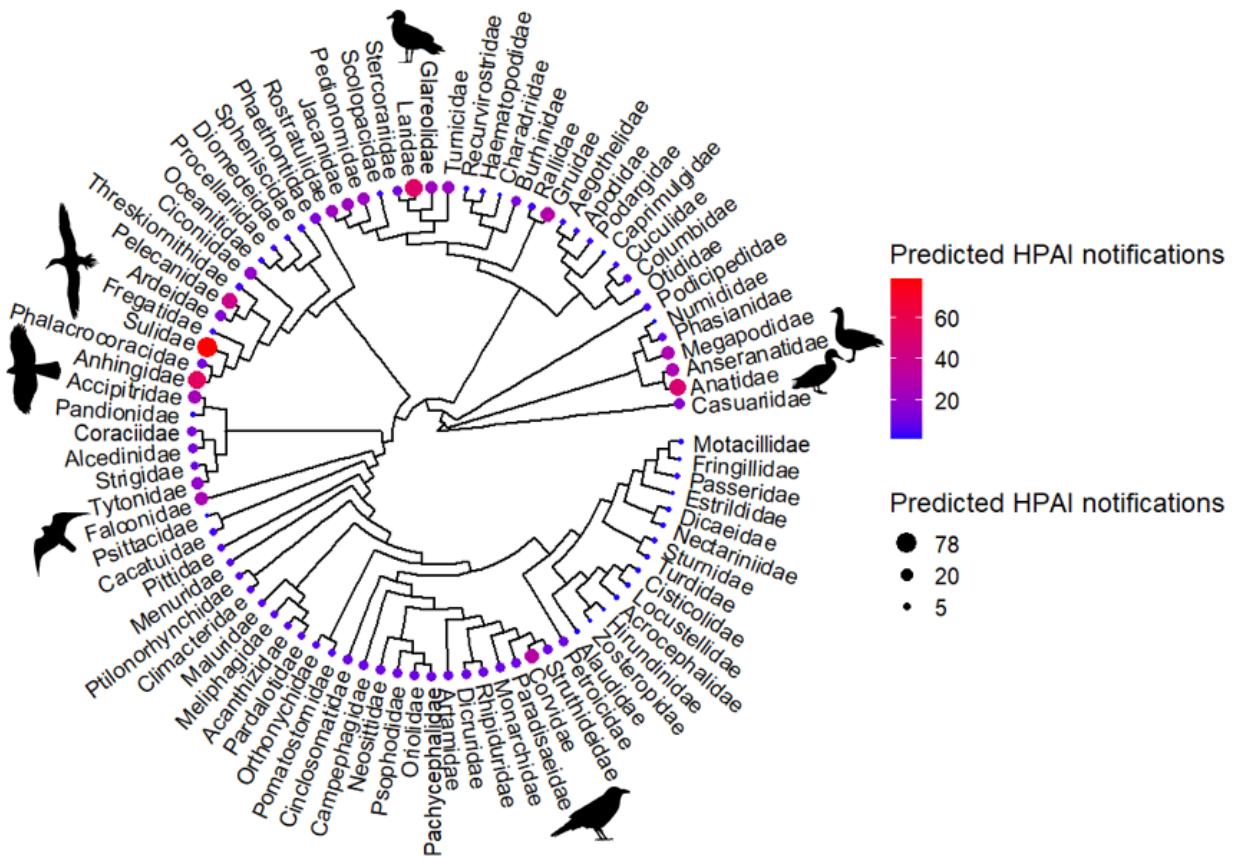

230

231 Using leave-one-out (LOO) cross validation, we compared the fit of this null, phylogeny-
232 only model and that of the ecological traits models. There were 4 models with
233 ecological traits, where 3 models consisted of a single ecological trait (habitat, diet, or
234 congregation) and a fourth model that included all three ecological traits. All four of
235 these models included the phylogeny. There was substantial overlap in the standard
236 errors of the LOO ICs computed for the models, which means that the additional
237 variables in our ecological models did not significantly improve model fit over the null,
238 phylogeny-only model (Figure S1; [28]). Therefore, we present results for the simpler,
239 phylogeny-only model.

240

241 When predicting Australian species' HPAI H5N1 susceptibility (defined as their
242 predicted HPAI H5N1 notifications), the predominant groupings of predicted
243 notifications were similar to that of the training model (Figure 2). The highest predicted
244 HPAI H5N1 susceptibility was predicted for Australian Sulidae (gannets and boobies),
245 followed by Anhingidae (darters), Laridae (gulls, terns and noddies), and Anatidae
246 (ducks, geese, and swans). Based on global HPAI H5N1 notification data since 2021 and
247 the family-level phylogeny, the model predicted 79 HPAI H5N1 notifications in Sulidae
248 family members, followed by 54 in Anhingidae, 51 in Laridae, and 48 in Anatidae family
249 members. Other Australian bird families, like Pelecanidae (pelicans), Corvidae (crows
250 and ravens), and Falconidae (falcons, hobbies, and kestrels), were also predicted to be
251 susceptible. Furthermore, some families endemic to Australia, such as Anseranatidae
252 (containing the magpie goose – *Anseranas semipalmata*), were predicted to be
253 moderately susceptible to HPAI H5N1 with a predicted 27 notifications. Predicted HPAI
254 H5N1 notifications for all Australian bird families in our list are reported in Supporting
255 Information Table S3.

256

263

264 Discussion

265 HPAI H5N1 2.3.4.4b has caused a panzootic of unprecedented scale [5], but has not yet
 266 spread to Australia [4]. Here, we modelled HPAI H5N1 notifications as a function of
 267 ecology and family-level phylogeny, finding that family-level phylogeny best explains
 268 number of HPAI H5N1 notifications. The importance of phylogeny in explaining avian
 269 influenza prevalence has been previously noted for low pathogenicity viruses [13],
 270 which we now expand for HPAI H5N1. Furthermore, we use phylogeny to predict HPAI
 271 H5N1 notifications in Australian birds (including for Australian endemic birds), as a
 272 metric of susceptibility to HPAI H5N1 infection and resulting disease once it reaches the
 273 continent.

274

275 While transmission of HPAI H5N1 is believed to link to ecological traits related to e.g.
276 (aquatic) habitat choice, (dabbling) foraging strategies, predation, and congregation,
277 including these ecological traits in our model did not significantly improve model fit.
278 However, we do not believe the support for our phylogeny-only model means that
279 ecological traits are not important – rather, there are specific traits as well as
280 combinations of traits yielding scenarios of probable disease transmission that are
281 likely captured by the family-level phylogeny. For example, Anatidae (ducks, geese, and
282 swans) have a high number of HPAI notifications globally and are among the families
283 predicted to be most susceptible to HPAI H5N1 in Australia, likely due to their aquatic
284 lifestyle. Conversely, we hypothesized terrestrial birds to have lower HPAI H5N1
285 notifications due to largely avoiding contact with HPAI virus contaminated water, but
286 many birds of prey (which have high HPAI H5N1 notifications) are terrestrial predators.
287 This specific interaction between diet and habitat may be important in predicting HPAI
288 H5N1 notifications, but it is captured already in the family-level phylogeny, as such
289 traits tend to be shared across members of a family and even entire orders. The
290 drawback of our approach is that the predicted HPAI H5N1 notifications are generalised
291 across species in a family. Generalising across families may be especially penalizing for
292 species that are ecological outliers compared to others within their family. For example,
293 our study predicts high HPAI H5N1 notifications for the Australasian wood duck
294 (*Chenonetta jubata*), despite its ecology differing from other ducks (it is an exclusively
295 grazing duck, while many others engage in filter feeding and dabbling) and its previous
296 identification as an outlier in having low LPAI virus and seroprevalence [13]. Despite
297 such exceptions, our predictions can serve as an initial guideline of species likely to be
298 impacted by HPAI H5N1, with additional information such as species' conservation
299 status, population size, and a variety of site- and species-specific factors used to
300 assess potential local impacts.

301

302 In our prediction of HPAI H5N1 susceptibility in Australian birds, we define susceptibility
303 as the predicted number of HPAI H5N1 notification for a taxonomic family (where high
304 numbers of predicted HPAI H5N1 notifications is interpreted as high susceptibility; with
305 79 HPAI H5N1 notifications in Sulidae being the highest score). This modelling is based

306 on data of “outbreak notifications” from WOAH WAHIS since October 2021 (the onset of
307 the current panzootic), where most (~98%) species with notifications also have
308 reported deaths from HPAI. This means that our predicted HPAI H5N1 susceptibility
309 reflects how easily different birds become infected and subsequently die of HPAI.
310 However, our susceptibility predictions largely ignore the role of different birds in
311 maintaining and spreading HPAI H5N1, since different species might carry the virus and
312 survive for different lengths of time. For example, bald eagles (*Haliaeetus*
313 *leucocephalus*) had higher HPAI H5N1 seroprevalence (indicating higher survival rate)
314 than other birds of prey [29], and HPAI antibodies in seabird eggs were higher in
315 common eiders compared to other seabird species (such as gannets, which suffered
316 HPAI-related mass mortality events; [30]). This suggests that species can play different
317 roles in maintenance and spread of HPAI H5N1 after exposure to the virus, which is
318 important to consider when predicting HPAI H5N1 susceptibility.

319

320 In this study, we used a family-level phylogeny to avoid biases associated with
321 particular outlier species. Our approach may still carry some inherent biases, for
322 example if a family is very speciose, very abundant, or contains very commonly
323 sampled species. However, when comparing the mean number of HPAI H5N1
324 notifications per family to the number of species in that family, the correlation was low
325 ($R^2 = -0.06$), meaning it is unlikely biases related to number of species in a family are
326 entirely driving our predictions. Indeed, because we analysed the data using the family-
327 level phylogeny that considers HPAI H5N1 notifications across a family (rather than just
328 the total), we avoid some of the exaggerated total HPAI H5N1 notifications associated
329 with very speciose and common families like Anatidae and Laridae (Figure 1). However,
330 it may also be argued that this introduces its own form of bias, if it “punishes” the HPAI
331 H5N1 susceptibility predictions for speciose and common families (hence why our
332 model predicts Sulidae, rather than Anatidae, to be the most susceptible Australian
333 family; Figure 1). It is also worth noting that our approach is inherently biased by people
334 sampling for and reporting notifications of HPAI H5N1, where real numbers of HPAI
335 H5N1 likely exceed recorded notifications by an order of magnitude [5]. Furthermore,
336 differences in sampling effort between regions may exacerbate such biases, if certain

337 families are more common in sparsely sampled regions and are thus more less
338 represented in WAHIS [12].

339

340 Partly because of biases in testing and reporting HPAI H5N1 outbreaks, we did not
341 employ a presence/absence approach to modelling HPAI H5N1 notifications and
342 predicting susceptibility in Australian species. Because of testing and reporting bias, we
343 cannot assume that species absent from the WAHIS dataset of HPAI H5N1 notifications
344 truly never had cases of HPAI H5N1, and thus we cannot assume that HPAI is absent.
345 However, our approach of using numbers of HPAI H5N1 notifications still suffers from
346 part of this bias and is likely to have influenced some of our predictions for Australian
347 species. For example, Anhingidae (darters) are amongst families with the highest
348 predicted notifications in Australia, but their non-Australian species are not currently
349 represented in the WAHIS database. However, the American darter's (*Anhinga anhinga*)
350 distribution includes regions severely impacted by the current panzootic, making it
351 likely the species has encountered the virus but that it just has not been detected,
352 tested and reported to WAHIS. The family's lack of representation in WAHIS means the
353 model used the Anhingidae phylogenetic information, and its proximity to Sulidae and
354 Phalacrocoracidae (the latter of which is also underestimated in WAHIS; [31]), to
355 estimate a value between the two other families. The lack of Anhingidae representation
356 in the WAHIS database, despite its probable interface with the virus, means the model
357 may have over-estimated the susceptibility of Australasian darters to HPAI H5N1 based
358 on its relationship to Sulidae. An opposite scenario may also be possible and potentially
359 detrimental: in some cases, our model may have falsely predicted a family as *not*
360 susceptible to HPAI H5N1. This further highlights the importance of not relying on our
361 predicted susceptibility in isolation, but also considering additional information. The
362 wide host range of the current panzootic highlights that all species are capable of
363 contracting the virus. However, lack of notifications and our assumptions of relative
364 completeness in the WAHIS database impacts our predictions for Australian families
365 susceptible to HPAI H5N1.

366

367 In our analysis, adding ecological traits like diet and habitat did not significantly improve
368 the predictability of HPAI H5N1 notifications above our null, phylogeny-only model.

369 However, this does not mean those traits are not still important to consider when
370 assessing virus incursion into new ranges, like Oceania. For example, traits like colony-
371 breeding can amplify the risk to a species if the virus is able to spread rapidly through a
372 large number of birds [16]. Australia hosts big breeding colonies of gannets,
373 shearwaters, and other notable seabirds, which might expose them to the same colony-
374 wide mass mortalities noted elsewhere [6, 31, 32]. Indeed, in our phylogeny-based
375 predictions of HPAI H5N1 notifications in Australian birds, half of the top 50 birds are
376 colony breeders. Therefore, even if dense flocking behaviour was not a major predictor
377 of HPAI H5N1 notifications in our analysis, it is a trait worth bearing in mind when
378 considering conservation impacts of HPAI H5N1 upon arrival in Australia.

379

380 A strength of our phylogeny-based approach to model and predict HPAI notifications is
381 that it likely captures similarity in immune architecture between closely related species,
382 in addition to the ecological similarities it captures. However, there are notable
383 exceptions to the expectation that closely related species share genomic similarities.
384 Such differences in species' immune architecture may influence their final
385 susceptibility to HPAI, and thus represents another aspect worth considering when
386 predicting HPAI H5N1 susceptibility in new ranges [33]. For example, the Australian
387 black swan (*Cygnus atratus*) is more vulnerable to HPAI than white swans and some
388 geese [33], likely because it lacks receptors for viral pattern recognition and has a poor
389 immune response to HPAI [34]. These differences set black swans apart even from
390 closely related species, like the mute swan (*Cygnus olor*). Should similar deficiencies in
391 immune system architecture exist for other Australian birds, it is possible the HPAI
392 H5N1 susceptibility for some Australian birds is underestimated in our analysis. While
393 our predictions of Australian species' susceptibility to HPAI H5N1 can function as an
394 important indicator of what is to come, expanded genomic and transcriptomic testing
395 can further fine-tune such predictions.

396

397 Among other factors that can be important to consider when predicting HPAI H5N1
398 susceptibility in Australian birds is conservation status, where rampant disease spread
399 may have a larger impact on more vulnerable populations. In Australian species with
400 highest predicted HPAI H5N1 notifications (within the top 50 predicted HPAI H5N1

401 notifications), all but two are listed as Least Concern on the IUCN Red List status. Only
402 the fairy tern (*Sternula nereis*) and the sarus crane (*Grus antigone*) are listed as
403 Vulnerable. However, expanding this to species predicted to be moderately susceptible
404 to HPAI H5N1 (top 80 predicted disease notifications), there is one species listed as
405 Endangered (red goshawk – *Erythrociorchis radiatus*), two additional birds listed as
406 Vulnerable (grey falcon – *Falco hypoleucus* and malleefowl – *Leipoa ocellata*), and one
407 Near Threatened (letter-winged kite – *Elanus scriptus*). It is notable that most of these
408 are birds of prey, suggesting that while HPAI H5N1 is primarily predicted to impact
409 waterbirds, the notable conservation impacts of HPAI H5N1 incursion into Australia
410 may focus on predators. The impact to predators might be similar to effects seen
411 elsewhere, such as declining peregrine falcon (*Falco peregrinus*) populations in the
412 Netherlands, where over 80% of tested dead birds were infected with HPAI H5N1 [35].
413 Conservation vulnerability of predators to HPAI H5N1 also underscores the potential
414 conservation concerns to mammalian predators [17], as has been noted in South
415 American pinnipeds [36].

416

417 **Conclusion**

418 HPAI H5N1 has dramatically impacted wildlife in the wake of its spread across the
419 world. While it has infected an unprecedented diversity of species, we found that a
420 family-level phylogeny was sufficient to explain HPAI H5N1 notifications in wild birds,
421 potentially because ecological traits are often conserved across members of a family.
422 Using this same phylogeny to predict HPAI H5N1 notifications in Australian birds, where
423 the virus has yet to spread, we are able to predict that Sulidae, Laridae, and Anatidae
424 family members are likely to be most susceptible to HPAI H5N1. Similarly, we are able
425 to predict susceptibility in Australian endemic families, such as the magpie geese
426 (*Anseranas semipalmata*). Such predictions may provide important support for those
427 undertaking planning for HPAI H5N1 incursion into Australia. Evaluating the accuracy of
428 such predictions (and the method used to generate them) will only be possible once
429 HPAI H5N1 does indeed reach Australian shores, and relies on continued and
430 expanding monitoring efforts.

431

432 **Acknowledgements**

433 We wish to acknowledge the work testing and reporting HPAI outbreaks by scientists
434 and community members worldwide, and WOAH WAHIS for storing all this data in their
435 database and allowing us access. We would also like to thank our research partners at
436 Wildlife Health Australia (WHA) for coordinating funding for this research, and the
437 Department of Agriculture, Fisheries, and Forestry, for funding this work. Finally, we
438 would like to thank our colleagues Libby Rumpff (Department of Climate Change,
439 Energy, and the Environment and Water; DCCEEW), Mark Carey (DCCEEW), Simone
440 Vitali (WHA), Tiggy Grillo (WHA), Claire Harrison (WHA), and Michelle Wille (University of
441 Melbourne and the Peter Doherty Institute for Infection and Immunity) who read and
442 provided feedback on the manuscript.

<i>Arenaria melanocephala</i>	Black Turnstone	Scolopacidae	Y	Marine/Coastal	Predator
<i>Asio flammeus</i>	Short-eared Owl	Strigidae	N	Terrestrial	Predator
<i>Asio otus</i>	Long-eared Owl	Strigidae	N	Terrestrial	Predator
<i>Athene noctua</i>	Little Owl	Strigidae	N	Terrestrial	Omnivore
<i>Aythya affinis</i>	Lesser Scaup	Anatidae	Y	Freshwater	Omnivore
<i>Aythya americana</i>	Redhead	Anatidae	Y	Freshwater	Omnivore
<i>Aythya collaris</i>	Ring-necked Duck	Anatidae	Y	Freshwater	Omnivore
<i>Aythya ferina</i>	Common Pochard	Anatidae	Y	Freshwater	Omnivore
<i>Aythya fuligula</i>	Tufted Duck	Anatidae	Y	Freshwater	Omnivore
<i>Aythya marila</i>	Greater Scaup	Anatidae	Y	Freshwater	Omnivore
<i>Aythya valisineria</i>	Canvasback	Anatidae	Y	Freshwater	Omnivore
<i>Balearica regulorum</i>	Grey Crowned Crane	Gruidae	Y	Freshwater	Omnivore

<i>Bonasa umbellus</i>	Ruffed Grouse	Phasianidae	N	Terrestrial	Plant-based diet
<i>Branta bernicla</i>	Brant Goose	Anatidae	Y	Terrestrial	Plant-based diet
<i>Branta canadensis</i>	Canada Goose	Anatidae	Y	Terrestrial	Plant-based diet
<i>Branta hutchinsii</i>	Cackling Goose	Anatidae	Y	Terrestrial	Plant-based diet
<i>Branta leucopsis</i>	Barnacle Goose	Anatidae	Y	Terrestrial	Plant-based diet
<i>Branta ruficollis</i>	Red-breasted Goose	Anatidae	Y	Terrestrial	Plant-based diet
<i>Branta sandvicensis</i>	Nene	Anatidae	N	Terrestrial	Plant-based diet
<i>Bubo bubo</i>	Eurasian Eagle-Owl	Strigidae	N	Terrestrial	Predator
<i>Bubo scandiacus</i>	Snowy Owl	Strigidae	N	Terrestrial	Predator
<i>Bubo virginianus</i>	Great Horned Owl	Strigidae	N	Terrestrial	Predator
<i>Bubulcus ibis</i>	Western Cattle Egret	Ardeidae	Y	Terrestrial	Omnivore
<i>Bucephala albeola</i>	Bufflehead	Anatidae	Y	Freshwater	Omnivore
<i>Bucephala clangula</i>	Common Goldeneye	Anatidae	Y	Freshwater	Omnivore
<i>Buteo buteo</i>	Common Buzzard	Accipitridae	N	Terrestrial	Predator
<i>Buteo jamaicensis</i>	Red-tailed Hawk	Accipitridae	N	Terrestrial	Predator
<i>Buteo japonicus</i>	Eastern Buzzard	Accipitridae	N	Terrestrial	Predator
<i>Buteo lagopus</i>	Rough-legged Buzzard	Accipitridae	N	Terrestrial	Predator
<i>Buteo lineatus</i>	Red-shouldered Hawk	Accipitridae	N	Terrestrial	Predator
<i>Buteo platypterus</i>	Broad-winged Hawk	Accipitridae	N	Terrestrial	Predator
<i>Buteo regalis</i>	Ferruginous Hawk	Accipitridae	N	Terrestrial	Predator
<i>Buteo swainsoni</i>	Swainson's Hawk	Accipitridae	Y	Terrestrial	Predator
<i>Buteogallus urubitinga</i>	Great Black Hawk	Accipitridae	N	Terrestrial	Predator
<i>Cairina moschata</i>	Muscovy Duck	Anatidae	Y	Freshwater	Omnivore
<i>Calamospiza melanocorys</i>	Lark Bunting	Passerellidae	Y	Terrestrial	Omnivore
<i>Calidris alba</i>	Sanderling	Scolopacidae	Y	Marine/Coastal	Predator
<i>Calidris alpina</i>	Dunlin	Scolopacidae	Y	Freshwater	Predator
<i>Calidris canutus</i>	Red Knot	Scolopacidae	Y	Marine/Coastal	Predator
<i>Calidris fuscicollis</i>	White-rumped Sandpiper	Scolopacidae	Y	Freshwater	Predator
<i>Calidris maritima</i>	Purple Sandpiper	Scolopacidae	Y	Terrestrial	Predator
<i>Calidris mauri</i>	Western Sandpiper	Scolopacidae	Y	Terrestrial	Predator
<i>Calidris pusilla</i>	Semipalmated Sandpiper	Scolopacidae	Y	Terrestrial	Predator

<i>Callipepla californica</i>	California Quail	Odontophoridae	N	Terrestrial	Omnivore
<i>Caprimulgus fossii</i>	Square-tailed Nightjar	Caprimulgidae	N	Terrestrial	Predator
<i>Caracara plancus</i>	Crested Caracara	Falconidae	N	Terrestrial	Omnivore
<i>Caracara plancus</i>	Crested Caracara	Falconidae	N	Terrestrial	Omnivore
<i>Carduelis carduelis</i>	European Goldfinch	Fringillidae	N	Terrestrial	Plant-based diet
<i>Cathartes aura</i>	Turkey Vulture	Cathartidae	Y	Terrestrial	Predator
<i>Centrocercus urophasianus</i>	Sage Grouse	Phasianidae	N	Terrestrial	Plant-based diet
<i>Cephus grylle</i>	Black Guillemot	Alcidae	Y	Marine/Coastal	Predator
<i>Charadrius hiaticula</i>	Common Ringed Plover	Charadriidae	Y	Marine/Coastal	Predator
<i>Charadrius mongolus</i>	Lesser Sand Plover	Charadriidae	Y	Freshwater	Predator
<i>Charadrius nivosus</i>	Snowy Plover	Charadriidae	Y	Marine/Coastal	Predator
<i>Chlidonias hybrida</i>	Whiskered Tern	Laridae	Y	Freshwater	Predator
<i>Chloephaga melanoptera</i>	Andean Goose	Anatidae	Y	Freshwater	Plant-based diet
<i>Chloephaga picta</i>	Upland Goose	Anatidae	Y	Terrestrial	Plant-based diet
<i>Chloris chloris</i>	European Greenfinch	Fringillidae	N	Terrestrial	Plant-based diet
<i>Chondestes grammacus</i>	Lark Sparrow	Passerellidae	Y	Terrestrial	Omnivore
<i>Ciconia boyciana</i>	Oriental Stork	Ciconiidae	Y	Freshwater	Predator
<i>Ciconia ciconia</i>	White Stork	Ciconiidae	Y	Terrestrial	Predator
<i>Ciconia nigra</i>	Black Stork	Ciconiidae	Y	Terrestrial	Predator
<i>Circus assimilis</i>	Spotted Harrier	Accipitridae	N	Terrestrial	Predator
<i>Circus cyaneus</i>	Hen Harrier	Accipitridae	Y	Terrestrial	Predator
<i>Circus pygargus</i>	Montagu's Harrier	Accipitridae	Y	Terrestrial	Predator
<i>Columba livia</i>	Rock Dove	Columbidae	Y	Terrestrial	Plant-based diet
<i>Columba palumbus</i>	Common Wood Pigeon	Columbidae	Y	Terrestrial	Omnivore
<i>Columbina inca</i>	Inca Dove	Columbidae	Y	Terrestrial	Plant-based diet
<i>Coragyps atratus</i>	Black Vulture	Cathartidae	Y	Terrestrial	Predator
<i>Corvus albus</i>	Pied Crow	Corvidae	N	Terrestrial	Omnivore
<i>Corvus brachyrhynchos</i>	American Crow	Corvidae	Y	Terrestrial	Omnivore
<i>Corvus brachyrhynchos</i>	American Crow	Corvidae	Y	Terrestrial	Omnivore
<i>Corvus corax</i>	Northern Raven	Corvidae	N	Terrestrial	Omnivore
<i>Corvus corone</i>	Carrión Crow	Corvidae	N	Terrestrial	Omnivore
<i>Corvus frugilegus</i>	Rook	Corvidae	Y	Terrestrial	Omnivore

<i>Corvus macrorhynchos</i>	Large-billed Crow	Corvidae	Y	Terrestrial	Omnivore
<i>Corvus ossifragus</i>	Fish Crow	Corvidae	Y	Marine/Coastal	Omnivore
<i>Corvus splendens</i>	House Crow	Corvidae	Y	Terrestrial	Omnivore
<i>Coscoroba coscoroba</i>	Coscoroba Swan	Anatidae	Y	Freshwater	Omnivore
<i>Cyanocitta cristata</i>	Blue Jay	Corvidae	N	Terrestrial	Omnivore
<i>Cyanoliseus patagonus</i>	Burrowing Parrot	Psittacidae	Y	Terrestrial	Omnivore
<i>Cygnus atratus</i>	Black Swan	Anatidae	Y	Freshwater	Plant-based diet
<i>Cygnus buccinator</i>	Trumpeter Swan	Anatidae	Y	Freshwater	Plant-based diet
<i>Cygnus columbianus</i>	Tundra Swan	Anatidae	Y	Freshwater	Plant-based diet
<i>Cygnus columbianus</i>	Tundra Swan	Anatidae	Y	Freshwater	Plant-based diet
<i>Cygnus cygnus</i>	Whooper Swan	Anatidae	Y	Freshwater	Plant-based diet
<i>Cygnus melancoryphus</i>	Black-necked Swan	Anatidae	Y	Freshwater	Plant-based diet
<i>Cygnus olor</i>	Mute Swan	Anatidae	Y	Freshwater	Plant-based diet
<i>Dendrocopos major</i>	Great Spotted Woodpecker	Picidae	N	Terrestrial	Omnivore
<i>Dendrocygna bicolor</i>	Fulvous Whistling Duck	Anatidae	Y	Freshwater	Omnivore
<i>Dendrocygna viduata</i>	White-faced Whistling Duck	Anatidae	Y	Freshwater	Omnivore
<i>Egretta caerulea</i>	Little Blue Heron	Ardeidae	Y	Freshwater	Predator
<i>Egretta garzetta</i>	Little Egret	Ardeidae	Y	Freshwater	Predator
<i>Egretta thula</i>	Snowy Egret	Ardeidae	Y	Freshwater	Predator
<i>Enicognathus ferrugineus</i>	Austral Parakeet	Psittacidae	N	Terrestrial	Omnivore
<i>Enicognathus leptorhynchus</i>	Slender-billed Parakeet	Psittacidae	Y	Terrestrial	Omnivore
<i>Eudyptes chrysocome</i>	Southern Rockhopper Penguin	Spheniscidae	Y	Marine/Coastal	Predator
<i>Falco biarmicus</i>	Lanner Falcon	Falconidae	N	Terrestrial	Predator
<i>Falco cherrug</i>	Saker Falcon	Falconidae	N	Terrestrial	Predator
<i>Falco columbarius</i>	Merlin	Falconidae	N	Terrestrial	Predator
<i>Falco mexicanus</i>	Prairie Falcon	Falconidae	N	Terrestrial	Predator
<i>Falco peregrinus</i>	Peregrine Falcon	Falconidae	N	Terrestrial	Predator
<i>Falco rusticolus</i>	Gyrfalcon	Falconidae	N	Terrestrial	Predator
<i>Falco sparverius</i>	American Kestrel	Falconidae	N	Terrestrial	Predator
<i>Falco tinnunculus</i>	Common Kestrel	Falconidae	N	Terrestrial	Predator
<i>Fratercula arctica</i>	Atlantic Puffin	Alcidae	Y	Marine/Coastal	Predator

<i>Fregata magnificens</i>	Magnificent Frigatebird	Fregatidae	Y	Marine/Coastal	Predator
<i>Fregata minor</i>	Great Frigatebird	Fregatidae	Y	Marine/Coastal	Predator
<i>Fringilla coelebs</i>	Common Chaffinch	Fringillidae	N	Terrestrial	Predator
<i>Fulica americana</i>	American Coot	Rallidae	Y	Freshwater	Plant-based diet
<i>Fulica armillata</i>	Red-gartered Coot	Rallidae	Y	Freshwater	Plant-based diet
<i>Fulica atra</i>	Eurasian Coot	Rallidae	Y	Freshwater	Plant-based diet
<i>Fulmarus glacialis</i>	Northern Fulmar	Procellariidae	Y	Marine/Coastal	Predator
<i>Fulmarus glacialisoides</i>	Southern Fulmar	Procellariidae	Y	Marine/Coastal	Predator
<i>Gallinago gallinago</i>	Common Snipe	Scolopacidae	Y	Freshwater	Predator
<i>Gallinago stenura</i>	Pin-tailed Snipe	Scolopacidae	Y	Freshwater	Predator
<i>Gallinula chloropus</i>	Common Moorhen	Rallidae	Y	Freshwater	Omnivore
<i>Gallus gallus</i>	Red Junglefowl	Phasianidae	N	Terrestrial	Omnivore
<i>Garrulus glandarius</i>	Eurasian Jay	Corvidae	N	Terrestrial	Omnivore
<i>Gavia immer</i>	Common Loon	Gaviidae	Y	Freshwater	Predator
<i>Gavia pacifica</i>	Pacific Loon	Gaviidae	Y	Freshwater	Predator
<i>Gavia stellata</i>	Red-throated Loon	Gaviidae	Y	Freshwater	Predator
<i>Gelochelidon nilotica</i>	Gull-billed Tern	Laridae	Y	Marine/Coastal	Predator
<i>Geranoaetus melanoleucus</i>	Black-chested Buzzard-Eagle	Accipitridae	N	Terrestrial	Predator
<i>Geranoaetus polyosoma</i>	Variable Hawk	Accipitridae	N	Terrestrial	Predator
<i>Geronticus eremita</i>	Northern Bald Ibis	Threskiornithidae	Y	Terrestrial	Predator
<i>Grus grus</i>	Common Crane	Gruidae	Y	Freshwater	Omnivore
<i>Grus japonensis</i>	Red-crowned Crane	Gruidae	Y	Freshwater	Omnivore
<i>Grus monacha</i>	Hooded Crane	Gruidae	Y	Freshwater	Omnivore
<i>Gymnogyps californianus</i>	California Condor	Cathartidae	N	Terrestrial	Predator
<i>Gypaetus barbatus</i>	Bearded Vulture	Accipitridae	N	Terrestrial	Predator
<i>Gyps fulvus</i>	Griffon Vulture	Accipitridae	Y	Terrestrial	Predator
<i>Haematopus ater</i>	Blackish Oystercatcher	Haematopodidae	Y	Marine/Coastal	Predator
<i>Haematopus moquini</i>	African Oystercatcher	Haematopodidae	Y	Marine/Coastal	Predator
<i>Haematopus ostralegus</i>	Eurasian Oystercatcher	Haematopodidae	Y	Marine/Coastal	Predator
<i>Haematopus palliatus</i>	American Oystercatcher	Haematopodidae	Y	Marine/Coastal	Predator

<i>Haliaeetus albicilla</i>	White-tailed Eagle	Accipitridae	Y	Terrestrial	Predator
<i>Haliaeetus leucocephalus</i>	Bald Eagle	Accipitridae	Y	Freshwater	Predator
<i>Haliaeetus pelagicus</i>	Steller's Sea Eagle	Accipitridae	Y	Freshwater	Predator
<i>Hirundo rustica</i>	Barn Swallow	Hirundinidae	Y	Terrestrial	Predator
<i>Hydroprogne caspia</i>	Caspian Tern	Laridae	Y	Freshwater	Predator
<i>Junco hyemalis</i>	Dark-eyed Junco	Passerellidae	N	Terrestrial	Plant-based diet
<i>Larosterna inca</i>	Inca Tern	Laridae	Y	Marine/Coastal	Predator
<i>Larus argentatus</i>	European Herring Gull	Laridae	Y	Marine/Coastal	Predator
<i>Larus armenicus</i>	Armenian Gull	Laridae	Y	Freshwater	Predator
<i>Larus belcheri</i>	Belcher's Gull	Laridae	Y	Marine/Coastal	Predator
<i>Larus brunnicephalus</i>	Brown-headed Gull	Laridae	Y	Freshwater	Predator
<i>Larus cachinnans</i>	Caspian Gull	Laridae	Y	Marine/Coastal	Predator
<i>Larus californicus</i>	California Gull	Laridae	Y	Marine/Coastal	Predator
<i>Larus canus</i>	Common Gull	Laridae	Y	Marine/Coastal	Predator
<i>Larus cirrocephalus</i>	Grey-headed Gull	Laridae	Y	Freshwater	Predator
<i>Larus delawarensis</i>	Ring-billed Gull	Laridae	Y	Marine/Coastal	Predator
<i>Larus dominicanus</i>	Kelp Gull	Laridae	Y	Marine/Coastal	Predator
<i>Larus fuscus</i>	Lesser Black-backed Gull	Laridae	Y	Marine/Coastal	Omnivore
<i>Larus genei</i>	Slender-billed Gull	Laridae	Y	Marine/Coastal	Predator
<i>Larus glaucescens</i>	Glaucous-winged Gull	Laridae	Y	Marine/Coastal	Predator
<i>Larus glaucopterus</i>	Iceland Gull	Laridae	Y	Marine/Coastal	Predator
<i>Larus glaucopterus</i>	Iceland Gull	Laridae	Y	Marine/Coastal	Predator
<i>Larus hartlaubii</i>	Hartlaub's Gull	Laridae	Y	Marine/Coastal	Predator
<i>Larus hyperboreus</i>	Glaucous Gull	Laridae	Y	Marine/Coastal	Omnivore
<i>Larus maculipennis</i>	Brown-hooded Gull	Laridae	Y	Freshwater	Predator
<i>Larus marinus</i>	Great Black-backed Gull	Laridae	Y	Marine/Coastal	Predator
<i>Larus michahellis</i>	Yellow-legged Gull	Laridae	Y	Marine/Coastal	Predator
<i>Larus novaehollandiae</i>	Silver Gull	Laridae	Y	Marine/Coastal	Omnivore
<i>Larus novaehollandiae</i>	Silver Gull	Laridae	Y	Marine/Coastal	Omnivore
<i>Larus occidentalis</i>	Western Gull	Laridae	Y	Marine/Coastal	Predator
<i>Larus philadelphia</i>	Bonaparte's Gull	Laridae	Y	Freshwater	Predator
<i>Larus ridibundus</i>	Black-headed Gull	Laridae	Y	Freshwater	Predator
<i>Larus ridibundus</i>	Black-headed Gull	Laridae	Y	Freshwater	Predator

<i>Larus schistisagus</i>	Slaty-backed Gull	Laridae	Y	Marine/Coastal	Predator
<i>Larus smithsonianus</i>	American Herring Gull	Laridae	Y	Marine/Coastal	Predator
<i>Leucocarbo atriceps</i>	Imperial Shag	Phalacrocoraciidae	Y	Marine/Coastal	Predator
<i>Leucocarbo magellanicus</i>	Rock Shag	Phalacrocoraciidae	Y	Marine/Coastal	Predator
<i>Lophodytes cucullatus</i>	Hooded Merganser	Anatidae	Y	Freshwater	Predator
<i>Lophura nycthemera</i>	Silver Pheasant	Phasianidae	N	Terrestrial	Omnivore
<i>Macronectes giganteus</i>	Southern Giant Petrel	Procellariidae	Y	Marine/Coastal	Predator
<i>Mareca americana</i>	American Wigeon	Anatidae	Y	Freshwater	Omnivore
<i>Mareca falcata</i>	Falcated Duck	Anatidae	Y	Freshwater	Omnivore
<i>Mareca penelope</i>	Eurasian Wigeon	Anatidae	Y	Freshwater	Omnivore
<i>Mareca strepera</i>	Gadwall	Anatidae	Y	Freshwater	Omnivore
<i>Marmaronetta angustirostris</i>	Marbled Duck	Anatidae	Y	Freshwater	Omnivore
<i>Megascops asio</i>	Eastern Screech Owl	Strigidae	N	Terrestrial	Predator
<i>Megascops choliba</i>	Tropical Screech Owl	Strigidae	N	Terrestrial	Predator
<i>Megascops kennicottii</i>	Western Screech Owl	Strigidae	N	Terrestrial	Predator
<i>Melanitta fusca</i>	Velvet Scoter	Anatidae	Y	Freshwater	Predator
<i>Melanitta nigra</i>	Common Scoter	Anatidae	Y	Freshwater	Predator
<i>Melanitta perspicillata</i>	Surf Scoter	Anatidae	Y	Freshwater	Predator
<i>Meleagris gallopavo</i>	Wild Turkey	Phasianidae	N	Terrestrial	Omnivore
<i>Mergus merganser</i>	Common Merganser	Anatidae	Y	Freshwater	Predator
<i>Mergus serrator</i>	Red-breasted Merganser	Anatidae	Y	Freshwater	Predator
<i>Microcarbo coronatus</i>	Crowned Cormorant	Phalacrocoraciidae	Y	Marine/Coastal	Predator
<i>Milvus migrans</i>	Black Kite	Accipitridae	Y	Terrestrial	Predator
<i>Milvus milvus</i>	Red Kite	Accipitridae	Y	Terrestrial	Predator
<i>Morus bassanus</i>	Northern Gannet	Sulidae	Y	Marine/Coastal	Predator
<i>Morus capensis</i>	Cape Gannet	Sulidae	Y	Marine/Coastal	Predator
<i>Mycteria americana</i>	Wood Stork	Ciconiidae	Y	Freshwater	Predator
<i>Netta rufina</i>	Red-crested Pochard	Anatidae	Y	Freshwater	Plant-based diet
<i>Nisaetus nipalensis</i>	Mountain Hawk-Eagle	Accipitridae	N	Terrestrial	Predator
<i>Numenius arquata</i>	Eurasian Curlew	Scolopacidae	Y	Terrestrial	Predator

<i>Numenius phaeopus</i>	Eurasian Whimbrel	Scolopacidae	Y	Marine/Coastal	Predator
<i>Numida meleagris</i>	Helmeted Guineafowl	Numididae	N	Terrestrial	Omnivore
<i>Nycticorax nycticorax</i>	Black-crowned Night Heron	Ardeidae	Y	Freshwater	Predator
<i>Oxyura jamaicensis</i>	Ruddy Duck	Anatidae	Y	Freshwater	Omnivore
<i>Pachyptila desolata</i>	Antarctic Prion	Procellariidae	Y	Marine/Coastal	Predator
<i>Pandion haliaetus</i>	Osprey	Pandionidae	Y	Marine/Coastal	Predator
<i>Parabuteo unicinctus</i>	Harris's Hawk	Accipitridae	N	Terrestrial	Predator
<i>Passer domesticus</i>	House Sparrow	Passeridae	Y	Terrestrial	Plant-based diet
<i>Passer montanus</i>	Eurasian Tree Sparrow	Passeridae	Y	Terrestrial	Plant-based diet
<i>Pelecanus crispus</i>	Dalmatian Pelican	Pelecanidae	Y	Freshwater	Predator
<i>Pelecanus erythrorhynchos</i>	American White Pelican	Pelecanidae	Y	Freshwater	Predator
<i>Pelecanus occidentalis</i>	Brown Pelican	Pelecanidae	Y	Marine/Coastal	Predator
<i>Pelecanus onocrotalus</i>	Great White Pelican	Pelecanidae	Y	Freshwater	Predator
<i>Pelecanus thagus</i>	Peruvian Pelican	Pelecanidae	Y	Marine/Coastal	Predator
<i>Phalacrocorax capensis</i>	Cape Cormorant	Phalacrocoraci dae	Y	Marine/Coastal	Predator
<i>Phalacrocorax carbo</i>	Great Cormorant	Phalacrocoraci dae	Y	Freshwater	Predator
<i>Phalacrocorax punctatus</i>	Spotted Shag	Phalacrocoraci dae	Y	Marine/Coastal	Predator
<i>Phalaropus lobatus</i>	Red-necked Phalarope	Scolopacidae	Y	Freshwater	Predator
<i>Phasianus colchicus</i>	Common Pheasant	Phasianidae	N	Terrestrial	Omnivore
<i>Phoebastria irrorata</i>	Waved Albatross	Diomedeidae	Y	Marine/Coastal	Predator
<i>Phoenicopterus chilensis</i>	Chilean Flamingo	Phoenicopterid ae	Y	Freshwater	Predator
<i>Phoenicopterus roseus</i>	Greater Flamingo	Phoenicopterid ae	Y	Freshwater	Predator
<i>Phylloscopus trochilus</i>	Willow Warbler	Phylloscopidae	N	Terrestrial	Predator
<i>Pica hudsonia</i>	Black-billed Magpie	Corvidae	N	Terrestrial	Omnivore
<i>Pica pica</i>	Eurasian Magpie	Corvidae	N	Terrestrial	Omnivore
<i>Piranga rubra</i>	Summer Tanager	Cardinalidae	N	Terrestrial	Predator
<i>Platalea ajaja</i>	Roseate Spoonbill	Threskiornithid ae	Y	Freshwater	Predator

<i>Platalea leucorodia</i>	Eurasian Spoonbill	Threskiornithidae	Y	Freshwater	Predator
<i>Platalea minor</i>	Black-faced Spoonbill	Threskiornithidae	Y	Marine/Coastal	Predator
<i>Plegadis chihi</i>	White-faced Ibis	Threskiornithidae	Y	Freshwater	Predator
<i>Plegadis falcinellus</i>	Glossy Ibis	Threskiornithidae	Y	Freshwater	Predator
<i>Pluvialis dominica</i>	American Golden Plover	Charadriidae	Y	Terrestrial	Predator
<i>Pluvialis squatarola</i>	Grey Plover	Charadriidae	Y	Terrestrial	Predator
<i>Podiceps auritus</i>	Horned Grebe	Podicipedidae	N	Freshwater	Predator
<i>Podiceps cristatus</i>	Great Crested Grebe	Podicipedidae	Y	Freshwater	Predator
<i>Podiceps grisegena</i>	Red-necked Grebe	Podicipedidae	Y	Freshwater	Predator
<i>Podiceps major</i>	Great Grebe	Podicipedidae	Y	Freshwater	Predator
<i>Podiceps nigricollis</i>	Black-necked Grebe	Podicipedidae	Y	Freshwater	Predator
<i>Podilymbus podiceps</i>	Pied-billed Grebe	Podicipedidae	N	Freshwater	Predator
<i>Poikilocarbo gaimardi</i>	Red-legged Cormorant	Phalacrocoraciidae	N	Marine/Coastal	Predator
<i>Procellaria aequinoctialis</i>	White-chinned Petrel	Procellariidae	Y	Marine/Coastal	Predator
<i>Pterodroma macroptera</i>	Great-winged Petrel	Procellariidae	Y	Marine/Coastal	Predator
<i>Puffinus puffinus</i>	Manx Shearwater	Procellariidae	Y	Marine/Coastal	Predator
<i>Pygochelidon cyanoleuca</i>	Blue-and-white Swallow	Hirundinidae	N	Terrestrial	Predator
<i>Pyrrhula pyrrhula</i>	Eurasian Bullfinch	Fringillidae	N	Terrestrial	Omnivore
<i>Quiscalus mexicanus</i>	Great-tailed Grackle	Icteridae	Y	Terrestrial	Omnivore
<i>Quiscalus quiscula</i>	Common Grackle	Icteridae	Y	Freshwater	Omnivore
<i>Rallus aquaticus</i>	Water Rail	Rallidae	N	Freshwater	Omnivore
<i>Rissa tridactyla</i>	Black-legged Kittiwake	Laridae	Y	Marine/Coastal	Predator
<i>Rupornis magnirostris</i>	Roadside Hawk	Accipitridae	N	Terrestrial	Predator
<i>Rynchops niger</i>	Black Skimmer	Laridae	Y	Freshwater	Predator
<i>Sagittarius serpentarius</i>	Secretarybird	Sagittariidae	N	Terrestrial	Predator
<i>Somateria mollissima</i>	Common Eider	Anatidae	Y	Marine/Coastal	Predator
<i>Spatula clypeata</i>	Northern Shoveler	Anatidae	Y	Freshwater	Predator
<i>Spatula cyanoptera</i>	Cinnamon Teal	Anatidae	Y	Freshwater	Omnivore

<i>Spatula cyanoptera</i>	Cinnamon Teal	Anatidae	Y	Freshwater	Omnivore
<i>Spatula discors</i>	Blue-winged Teal	Anatidae	Y	Freshwater	Omnivore
<i>Spatula querquedula</i>	Garganey	Anatidae	Y	Freshwater	Omnivore
<i>Spatula rhynchos</i>	Australasian Shoveler	Anatidae	Y	Freshwater	Omnivore
<i>Spheniscus demersus</i>	African Penguin	Spheniscidae	Y	Marine/Coastal	Predator
<i>Spheniscus humboldti</i>	Humboldt Penguin	Spheniscidae	Y	Marine/Coastal	Predator
<i>Spilornis cheela</i>	Crested Serpent Eagle	Accipitridae	N	Terrestrial	Predator
<i>Stercorarius parasiticus</i>	Parasitic Jaeger	Stercorariidae	Y	Marine/Coastal	Predator
<i>Sterna dougallii</i>	Roseate Tern	Laridae	Y	Marine/Coastal	Predator
<i>Sterna forsteri</i>	Forster's Tern	Laridae	Y	Freshwater	Predator
<i>Sterna hirundinacea</i>	South American Tern	Laridae	Y	Marine/Coastal	Predator
<i>Sterna hirundo</i>	Common Tern	Laridae	Y	Marine/Coastal	Predator
<i>Sterna paradisaea</i>	Arctic Tern	Laridae	Y	Marine/Coastal	Predator
<i>Sternula albifrons</i>	Little Tern	Laridae	Y	Marine/Coastal	Predator
<i>Streptopelia decaocto</i>	Eurasian Collared Dove	Columbidae	Y	Terrestrial	Omnivore
<i>Streptopelia turtur</i>	European Turtle Dove	Columbidae	N	Terrestrial	Plant-based diet
<i>Strix aluco</i>	Tawny Owl	Strigidae	N	Terrestrial	Predator
<i>Strix nebulosa</i>	Great Grey Owl	Strigidae	N	Terrestrial	Predator
<i>Strix uralensis</i>	Ural Owl	Strigidae	N	Terrestrial	Predator
<i>Strix varia</i>	Barred Owl	Strigidae	N	Terrestrial	Predator
<i>Sturnus vulgaris</i>	Common Starling	Sturnidae	Y	Terrestrial	Omnivore
<i>Sula leucogaster</i>	Brown Booby	Sulidae	Y	Marine/Coastal	Predator
<i>Sula nebouxii</i>	Blue-footed Booby	Sulidae	Y	Marine/Coastal	Predator
<i>Sula sula</i>	Red-footed Booby	Sulidae	Y	Marine/Coastal	Predator
<i>Sula variegata</i>	Peruvian Booby	Sulidae	Y	Marine/Coastal	Predator
<i>Tachybaptus ruficollis</i>	Little Grebe	Podicipedidae	Y	Freshwater	Predator
<i>Tachycineta bicolor</i>	Tree Swallow	Hirundinidae	Y	Freshwater	Predator
<i>Tachyeres pteneres</i>	Fuegian Steamer Duck	Anatidae	Y	Marine/Coastal	Predator
<i>Tadorna ferruginea</i>	Ruddy Shelduck	Anatidae	Y	Freshwater	Omnivore
<i>Tadorna tadorna</i>	Common Shelduck	Anatidae	Y	Marine/Coastal	Omnivore
<i>Taeniopygia guttata</i>	Sunda Zebra Finch	Estrildidae	Y	Terrestrial	Plant-based diet
<i>Thalassarche melanophrys</i>	Black-browed Albatross	Diomedeidae	Y	Marine/Coastal	Predator

<i>Thalasseus bergii</i>	Greater Crested Tern	Laridae	Y	Marine/Coastal	Predator
<i>Thalasseus elegans</i>	Elegant Tern	Laridae	Y	Marine/Coastal	Predator
<i>Thalasseus maximus</i>	Royal Tern	Laridae	Y	Marine/Coastal	Predator
<i>Thalasseus sandvicensis</i>	Sandwich Tern	Laridae	Y	Marine/Coastal	Predator
<i>Tringa flavipes</i>	Lesser Yellowlegs	Scolopacidae	Y	Freshwater	Predator
<i>Tringa melanoleuca</i>	Greater Yellowlegs	Scolopacidae	Y	Freshwater	Predator
<i>Tringa ochropus</i>	Green Sandpiper	Scolopacidae	Y	Freshwater	Predator
<i>Tringa semipalmata</i>	Willet	Scolopacidae	Y	Marine/Coastal	Predator
<i>Tringa totanus</i>	Common Redshank	Scolopacidae	Y	Freshwater	Predator
<i>Turdus merula</i>	Common Blackbird	Turdidae	N	Terrestrial	Omnivore
<i>Turdus migratorius</i>	American Robin	Turdidae	N	Terrestrial	Omnivore
<i>Turdus philomelos</i>	Song Thrush	Turdidae	N	Terrestrial	Omnivore
<i>Tyrannus verticalis</i>	Western Kingbird	Tyrannidae	N	Terrestrial	Omnivore
<i>Tyto alba</i>	Western Barn Owl	Tytonidae	N	Terrestrial	Predator
<i>Uria aalge</i>	Common Murre	Alcidae	Y	Marine/Coastal	Predator
<i>Uria lomvia</i>	Thick-billed Murre	Alcidae	Y	Marine/Coastal	Predator
<i>Urile penicillatus</i>	Brandt's Cormorant	Phalacrocoraciidae	Y	Marine/Coastal	Predator
<i>Vanellus chilensis</i>	Southern Lapwing	Charadriidae	Y	Terrestrial	Omnivore
<i>Vanellus vanellus</i>	Northern Lapwing	Charadriidae	Y	Freshwater	Omnivore
<i>Xema sabini</i>	Sabine's Gull	Laridae	Y	Marine/Coastal	Predator
<i>Zenaida macroura</i>	Mourning Dove	Columbidae	N	Terrestrial	Plant-based diet

598 *Table S2: Australian species ecological traits used in our prediction of Australian*
 599 *species' susceptibility to HPAI. Species are listed by their binomial name, their common*
 600 *name, and their taxonomic family. Traits include whether they congregate or not (Y/N),*
 601 *their general habitat, their general diet, and their IUCN redlist status.*

Species binomial name	Species common name	Family	Congregator?	Habitat Groupings	Diet Groupings	IUCN status
<i>Acanthiza apicalis</i>	Inland Thornbill	Acanthizidae	N	Terrestrial	Predator	LC
<i>Acanthiza chrysorrhoa</i>	Yellow-rumped Thornbill	Acanthizidae	N	Terrestrial	Predator	LC
<i>Acanthiza ewingii</i>	Tasmanian Thornbill	Acanthizidae	N	Terrestrial	Predator	LC
<i>Acanthiza inornata</i>	Western Thornbill	Acanthizidae	N	Terrestrial	Predator	LC
<i>Acanthiza iredalei</i>	Slender-billed Thornbill	Acanthizidae	N	Terrestrial	Predator	LC
<i>Acanthiza lineata</i>	Striated Thornbill	Acanthizidae	N	Terrestrial	Predator	LC
<i>Acanthiza nana</i>	Yellow Thornbill	Acanthizidae	N	Terrestrial	Predator	LC
<i>Acanthiza pusilla</i>	Brown Thornbill	Acanthizidae	N	Terrestrial	Predator	LC
<i>Acanthiza reguloides</i>	Buff-rumped Thornbill	Acanthizidae	N	Terrestrial	Predator	LC
<i>Acanthiza robustirostris</i>	Slaty-backed Thornbill	Acanthizidae	N	Terrestrial	Predator	LC
<i>Acanthiza uropygialis</i>	Chestnut-rumped Thornbill	Acanthizidae	N	Terrestrial	Predator	LC
<i>Acanthornis magna</i>	Scrubtit	Acanthizidae	N	Terrestrial	Predator	LC
<i>Aphelocephala leucopsis</i>	Southern Whiteface	Acanthizidae	N	Terrestrial	Predator	VU
<i>Aphelocephala nigricincta</i>	Banded Whiteface	Acanthizidae	N	Terrestrial	Predator	LC
<i>Aphelocephala pectoralis</i>	Chestnut-breasted Whiteface	Acanthizidae	N	Terrestrial	Predator	NT
<i>Calamanthus campestris</i>	Rufous Fieldwren	Acanthizidae	N	Terrestrial	Predator	LC
<i>Calamanthus cautus</i>	Shy Heathwren	Acanthizidae	N	Terrestrial	Predator	LC
<i>Calamanthus fuliginosus</i>	Striated Fieldwren	Acanthizidae	N	Terrestrial	Predator	LC
<i>Calamanthus montanellus</i>	Western Fieldwren	Acanthizidae	N	Terrestrial	Predator	LC

<i>Calamanthus pyrrhopygus</i>	Chestnut-rumped Heathwren	Acanthizidae	N	Terrestrial	Predator	LC
<i>Gerygone chloronota</i>	Green-backed Gerygone	Acanthizidae	N	Terrestrial	Predator	LC
<i>Gerygone fusca</i>	Western Gerygone	Acanthizidae	N	Terrestrial	Predator	LC
<i>Gerygone levigaster</i>	Mangrove Gerygone	Acanthizidae	N	Terrestrial	Predator	LC
<i>Gerygone magnirostris</i>	Large-billed Gerygone	Acanthizidae	N	Terrestrial	Predator	LC
<i>Gerygone mouki</i>	Brown Gerygone	Acanthizidae	N	Terrestrial	Predator	LC
<i>Gerygone olivacea</i>	White-throated Gerygone	Acanthizidae	N	Terrestrial	Predator	LC
<i>Gerygone palpebrosa</i>	Fairy Gerygone	Acanthizidae	N	Terrestrial	Predator	LC
<i>Gerygone tenebrosa</i>	Dusky Gerygone	Acanthizidae	N	Terrestrial	Predator	LC
<i>Origma solitaria</i>	Rockwarbler	Acanthizidae	N	Terrestrial	Predator	LC
<i>Pycnoptilus floccosus</i>	Pilotbird	Acanthizidae	N	Terrestrial	Predator	VU
<i>Pyrrholaemus brunneus</i>	Redthroat	Acanthizidae	N	Terrestrial	Predator	LC
<i>Pyrrholaemus sagittatus</i>	Speckled Warbler	Acanthizidae	N	Terrestrial	Predator	LC
<i>Sericornis citreogularis</i>	Yellow-throated Scrubwren	Acanthizidae	N	Terrestrial	Predator	LC
<i>Sericornis frontalis</i>	White-browed Scrubwren	Acanthizidae	N	Terrestrial	Predator	LC
<i>Sericornis humilis</i>	Tasmanian Scrubwren	Acanthizidae	N	Terrestrial	Predator	LC
<i>Sericornis magnirostra</i>	Large-billed Scrubwren	Acanthizidae	N	Terrestrial	Predator	LC
<i>Smicrornis brevirostris</i>	Weebill	Acanthizidae	N	Terrestrial	Predator	LC
<i>Accipiter cirrocephalus</i>	Collared Sparrowhawk	Accipitridae	N	Terrestrial	Predator	LC
<i>Accipiter fasciatus</i>	Brown Goshawk	Accipitridae	N	Terrestrial	Predator	LC
<i>Accipiter novaehollandiae</i>	Grey Goshawk	Accipitridae	N	Terrestrial	Predator	LC
<i>Aquila audax</i>	Wedge-tailed Eagle	Accipitridae	N	Terrestrial	Predator	LC
<i>Aviceda subcristata</i>	Pacific Baza	Accipitridae	N	Terrestrial	Predator	LC

<i>Circus approximans</i>	Swamp Harrier	Accipitridae	N	Freshwater	Predator	LC
<i>Circus assimilis</i>	Spotted Harrier	Accipitridae	N	Terrestrial	Predator	LC
<i>Elanus axillaris</i>	Black-shouldered Kite	Accipitridae	N	Terrestrial	Predator	LC
<i>Elanus scriptus</i>	Letter-winged Kite	Accipitridae	N	Terrestrial	Predator	NT
<i>Erythrotriorchis radiatus</i>	Red Goshawk	Accipitridae	N	Terrestrial	Predator	EN
<i>Haliaeetus leucogaster</i>	White-bellied Sea-Eagle	Accipitridae	N	Marine/Coastal	Predator	LC
<i>Haliastur indus</i>	Brahminy Kite	Accipitridae	N	Marine/Coastal	Predator	LC
<i>Haliastur sphenurus</i>	Whistling Kite	Accipitridae	N	Freshwater	Predator	LC
<i>Hamirostra melanosternon</i>	Black-breasted Buzzard	Accipitridae	N	Terrestrial	Predator	LC
<i>Hieraetus morphnoides</i>	Little Eagle	Accipitridae	N	Terrestrial	Predator	LC
<i>Lophoictinia isura</i>	Square-tailed Kite	Accipitridae	N	Terrestrial	Predator	LC
<i>Milvus migrans</i>	Black Kite	Accipitridae	Y	Terrestrial	Predator	LC
<i>Acrocephalus australis</i>	Australian Reed-Warbler	Acrocephalidae	N	Freshwater	Predator	LC
<i>Aegotheles cristatus</i>	Australian Owlet-nightjar	Aegothelidae	N	Terrestrial	Predator	LC
<i>Alauda arvensis</i>	Eurasian Skylark	Alaudidae	N	Terrestrial	Omnivore	LC
<i>Mirafra javanica</i>	Horsfield's Bushlark	Alaudidae	N	Terrestrial	Omnivore	LC
<i>Ceyx azureus</i>	Azure Kingfisher	Alcedinidae	N	Freshwater	Predator	LC
<i>Ceyx pusillus</i>	Little Kingfisher	Alcedinidae	N	Terrestrial	Predator	LC
<i>Dacelo leachii</i>	Blue-winged Kookaburra	Alcedinidae	N	Terrestrial	Predator	LC
<i>Dacelo novaeguineae</i>	Laughing Kookaburra	Alcedinidae	N	Terrestrial	Predator	LC
<i>Tanysiptera sylvia</i>	Buff-breasted Paradise-Kingfisher	Alcedinidae	N	Terrestrial	Predator	LC
<i>Todiramphus chloris</i>	Collared Kingfisher	Alcedinidae	N	Terrestrial	Predator	LC
<i>Todiramphus macleayii</i>	Forest Kingfisher	Alcedinidae	N	Marine/Coastal	Predator	LC
<i>Todiramphus pyrrhopygius</i>	Red-backed Kingfisher	Alcedinidae	N	Terrestrial	Predator	LC

<i>Todiramphus sanctus</i>	Sacred Kingfisher	Alcedinidae	N	Terrestrial	Predator	LC
<i>Anas castanea</i>	Chestnut Teal	Anatidae	Y	Freshwater	Omnivore	LC
<i>Anas gracilis</i>	Grey Teal	Anatidae	Y	Freshwater	Omnivore	LC
<i>Anas superciliosa</i>	Pacific Black Duck	Anatidae	Y	Freshwater	Omnivore	LC
<i>Aythya australis</i>	Hardhead	Anatidae	Y	Freshwater	Omnivore	LC
<i>Biziura lobata</i>	Musk Duck	Anatidae	Y	Freshwater	Predator	LC
<i>Cereopsis novaehollandiae</i>	Cape Barren Goose	Anatidae	Y	Terrestrial	Plant-based diet	LC
<i>Chenonetta jubata</i>	Australian Wood Duck	Anatidae	Y	Freshwater	Plant-based diet	LC
<i>Cygnus atratus</i>	Black Swan	Anatidae	Y	Freshwater	Plant-based diet	LC
<i>Dendrocygna arcuata</i>	Wandering Whistling-Duck	Anatidae	Y	Freshwater	Plant-based diet	LC
<i>Dendrocygna eytoni</i>	Plumed Whistling-Duck	Anatidae	Y	Terrestrial	Plant-based diet	LC
<i>Dendrocygna guttata</i>	Spotted Whistling-Duck	Anatidae	Y	Freshwater	Omnivore	LC
<i>Malacorhynchus membranaceus</i>	Pink-eared Duck	Anatidae	Y	Freshwater	Omnivore	LC
<i>Nettapus coromandelianus</i>	Cotton Pygmy-goose	Anatidae	Y	Freshwater	Plant-based diet	LC
<i>Nettapus pulchellus</i>	Green Pygmy-goose	Anatidae	Y	Freshwater	Plant-based diet	LC
<i>Oxyura australis</i>	Blue-billed Duck	Anatidae	Y	Freshwater	Omnivore	LC
<i>Radjah radjah</i>	Radjah Shelduck	Anatidae	Y	Marine/Coastal	Omnivore	LC
<i>Spatula rhynchos</i>	Australasian Shoveler	Anatidae	Y	Freshwater	Omnivore	LC
<i>Stictonetta naevosa</i>	Freckled Duck	Anatidae	Y	Freshwater	Omnivore	LC
<i>Tadorna tadornoides</i>	Australian Shelduck	Anatidae	Y	Freshwater	Omnivore	LC
<i>Anhinga novaehollandiae</i>	Australasian Darter	Anhingidae	Y	Freshwater	Predator	LC
<i>Anseranas semipalmata</i>	Magpie Goose	Anseranatidae	Y	Freshwater	Plant-based diet	LC
<i>Aerodramus terraereginae</i>	Australian Swiftlet	Apodidae	Y	Terrestrial	Predator	LC
<i>Apus pacificus</i>	Fork-tailed Swift	Apodidae	Y	Terrestrial	Predator	LC
<i>Hirundapus caudacutus</i>	White-throated Needletail	Apodidae	Y	Terrestrial	Predator	LC

<i>Ardea alba</i>	Great Egret	Ardeidae	Y	Freshwater	Predator	LC
<i>Ardea intermedia</i>	Intermediate Egret	Ardeidae	Y	Freshwater	Predator	LC
<i>Ardea pacifica</i>	White-necked Heron	Ardeidae	Y	Freshwater	Predator	LC
<i>Ardea sumatrana</i>	Great-billed Heron	Ardeidae	N	Marine/Coastal	Predator	LC
<i>Botaurus poiciloptilus</i>	Australasian Bittern	Ardeidae	N	Freshwater	Predator	VU
<i>Bubulcus ibis</i>	Cattle Egret	Ardeidae	Y	Terrestrial	Predator	LC
<i>Butorides striata</i>	Striated Heron	Ardeidae	Y	Freshwater	Predator	LC
<i>Egretta garzetta</i>	Little Egret	Ardeidae	Y	Freshwater	Predator	LC
<i>Egretta novaehollandiae</i>	White-faced Heron	Ardeidae	Y	Freshwater	Predator	LC
<i>Egretta picata</i>	Pied Heron	Ardeidae	Y	Marine/Coastal	Predator	LC
<i>Egretta sacra</i>	Eastern Reef Egret	Ardeidae	Y	Marine/Coastal	Predator	LC
<i>Ixobrychus dubius</i>	Australian Little Bittern	Ardeidae	N	Freshwater	Predator	LC
<i>Ixobrychus flavicollis</i>	Black Bittern	Ardeidae	N	Freshwater	Predator	LC
<i>Nycticorax caledonicus</i>	Nankeen Night-Heron	Ardeidae	Y	Freshwater	Predator	LC
<i>Artamus cinereus</i>	Black-faced Woodswallow	Artamidae	N	Terrestrial	Predator	LC
<i>Artamus cyanopterus</i>	Dusky Woodswallow	Artamidae	N	Terrestrial	Predator	LC
<i>Artamus minor</i>	Little Woodswallow	Artamidae	N	Terrestrial	Predator	LC
<i>Artamus personatus</i>	Masked Woodswallow	Artamidae	Y	Terrestrial	Predator	LC
<i>Artamus superciliosus</i>	White-browed Woodswallow	Artamidae	Y	Terrestrial	Predator	LC
<i>Cracticus argenteus</i>	Silver-backed Butcherbird	Artamidae	N	Terrestrial	Omnivore	LC
<i>Cracticus mentalis</i>	Black-backed Butcherbird	Artamidae	N	Terrestrial	Predator	LC
<i>Cracticus nigrogularis</i>	Pied Butcherbird	Artamidae	N	Terrestrial	Omnivore	LC
<i>Cracticus torquatus</i>	Grey Butcherbird	Artamidae	N	Terrestrial	Omnivore	LC
<i>Gymnorhina tibicen</i>	Australian Magpie	Artamidae	N	Terrestrial	Predator	LC
<i>Melloria quoyi</i>	Black Butcherbird	Artamidae	N	Terrestrial	Omnivore	LC
<i>Strepera fuliginosa</i>	Black Currawong	Artamidae	N	Terrestrial	Omnivore	LC
<i>Strepera graculina</i>	Pied Currawong	Artamidae	N	Terrestrial	Omnivore	LC

<i>Strepera versicolor</i>	Grey Currawong	Artamidae	N	Terrestrial	Omnivore	LC
<i>Artamus leucorynchus</i>	White-breasted Woodswallow	Artamidae	Y	Terrestrial	Predator	LC
<i>Burhinus grallarius</i>	Bush Stone-curlew	Burhinidae	N	Terrestrial	Predator	LC
<i>Esacus magnirostris</i>	Beach Stone-curlew	Burhinidae	N	Marine/Coastal	Predator	NT
<i>Cacatua galerita</i>	Sulphur-crested Cockatoo	Cacatuidae	Y	Terrestrial	Omnivore	LC
<i>Cacatua leadbeateri</i>	Major Mitchell's Cockatoo	Cacatuidae	N	Terrestrial	Plant-based diet	LC
<i>Cacatua pastinator</i>	Western Corella	Cacatuidae	Y	Terrestrial	Plant-based diet	LC
<i>Cacatua sanguinea</i>	Little Corella	Cacatuidae	Y	Terrestrial	Plant-based diet	LC
<i>Cacatua tenuirostris</i>	Long-billed Corella	Cacatuidae	Y	Terrestrial	Plant-based diet	LC
<i>Callocephalon fimbriatum</i>	Gang-gang Cockatoo	Cacatuidae	N	Terrestrial	Omnivore	VU
<i>Calyptorhynchus banksii</i>	Red-tailed Black-Cockatoo	Cacatuidae	Y	Terrestrial	Plant-based diet	LC
<i>Calyptorhynchus lathami</i>	Glossy Black-Cockatoo	Cacatuidae	N	Terrestrial	Plant-based diet	VU
<i>Eolophus roseicapilla</i>	Galah	Cacatuidae	Y	Terrestrial	Omnivore	LC
<i>Nymphicus hollandicus</i>	Cockatiel	Cacatuidae	Y	Terrestrial	Plant-based diet	LC
<i>Zanda baudinii</i>	Baudin's Black-Cockatoo	Cacatuidae	Y	Terrestrial	Omnivore	CR
<i>Zanda funerea</i>	Yellow-tailed Black-Cockatoo	Cacatuidae	Y	Terrestrial	Omnivore	LC
<i>Zanda latirostris</i>	Carnaby's Black-Cockatoo	Cacatuidae	Y	Terrestrial	Plant-based diet	EN
<i>Coracina lineata</i>	Barred Cuckoo-shrike	Campephagidae	N	Terrestrial	Omnivore	LC
<i>Coracina maxima</i>	Ground Cuckoo-shrike	Campephagidae	N	Terrestrial	Predator	LC
<i>Coracina novaehollandiae</i>	Black-faced Cuckoo-shrike	Campephagidae	N	Terrestrial	Predator	LC

<i>Coracina papuensis</i>	White-bellied Cuckoo-shrike	Campephagidae	N	Terrestrial	Predator	LC
<i>Edolisoma tenuirostre</i>	Common Cicadabird	Campephagidae	N	Terrestrial	Predator	LC
<i>Lalage leucomela</i>	Varied Triller	Campephagidae	N	Terrestrial	Predator	LC
<i>Lalage tricolor</i>	White-winged Triller	Campephagidae	N	Terrestrial	Predator	LC
<i>Caprimulgus macrurus</i>	Large-tailed Nightjar	Caprimulgidae	N	Terrestrial	Predator	LC
<i>Casuarius casuarius</i>	Southern Cassowary	Casuariidae	N	Terrestrial	Omnivore	LC
<i>Dromaius novaehollandiae</i>	Emu	Casuariidae	N	Terrestrial	Omnivore	LC
<i>Charadrius bicinctus</i>	Double-banded Plover	Charadriidae	Y	Freshwater	Predator	NT
<i>Charadrius leschenaultii</i>	Greater Sand Plover	Charadriidae	Y	Marine/Coastal	Predator	LC
<i>Charadrius mongolus</i>	Lesser Sand Plover	Charadriidae	Y	Freshwater	Predator	EN
<i>Charadrius ruficollis</i>	Red-capped Plover	Charadriidae	Y	Marine/Coastal	Predator	LC
<i>Charadrius veredus</i>	Oriental Plover	Charadriidae	Y	Freshwater	Predator	LC
<i>Elseyornis melanops</i>	Black-fronted Dotterel	Charadriidae	N	Freshwater	Predator	LC
<i>Erythrogonyx cinctus</i>	Red-kneed Dotterel	Charadriidae	Y	Freshwater	Predator	LC
<i>Peltohyas australis</i>	Inland Dotterel	Charadriidae	N	Terrestrial	Predator	LC
<i>Pluvialis fulva</i>	Pacific Golden Plover	Charadriidae	Y	Terrestrial	Predator	LC
<i>Pluvialis squatarola</i>	Grey Plover	Charadriidae	Y	Terrestrial	Predator	VU
<i>Thinornis cucullatus</i>	Hooded Plover	Charadriidae	N	Marine/Coastal	Predator	VU
<i>Vanellus miles</i>	Masked Lapwing	Charadriidae	Y	Terrestrial	Predator	LC
<i>Vanellus tricolor</i>	Banded Lapwing	Charadriidae	N	Terrestrial	Omnivore	LC
<i>Ephippiorhynchus asiaticus</i>	Black-necked Stork	Ciconiidae	Y	Freshwater	Predator	NT
<i>Cinclosoma alisteri</i>	Nullarbor Quail-thrush	Cinclosomatidae	N	Terrestrial	Omnivore	LC
<i>Cinclosoma castaneothorax</i>	Chestnut-breasted Quail-thrush	Cinclosomatidae	N	Terrestrial	Omnivore	LC
<i>Cinclosoma castanotum</i>	Chestnut Quail-thrush	Cinclosomatidae	N	Terrestrial	Omnivore	LC

<i>Cinclosoma cinnamomeum</i>	Cinnamon Quail-thrush	Cinclosomatidae	N	Terrestrial	Omnivore	LC
<i>Cinclosoma marginatum</i>	Western Quail-thrush	Cinclosomatidae	N	Terrestrial	Omnivore	LC
<i>Cinclosoma punctatum</i>	Spotted Quail-thrush	Cinclosomatidae	N	Terrestrial	Predator	LC
<i>Cisticola exilis</i>	Golden-headed Cisticola	Cisticolidae	N	Terrestrial	Predator	LC
<i>Cisticola juncidis</i>	Zitting Cisticola	Cisticolidae	N	Terrestrial	Predator	LC
<i>Climacteris affinis</i>	White-browed Treecreeper	Climacteridae	N	Terrestrial	Predator	LC
<i>Climacteris erythrops</i>	Red-browed Treecreeper	Climacteridae	N	Terrestrial	Predator	LC
<i>Climacteris melanurus</i>	Black-tailed Treecreeper	Climacteridae	N	Terrestrial	Predator	LC
<i>Climacteris picumnus</i>	Brown Treecreeper	Climacteridae	N	Terrestrial	Predator	LC
<i>Climacteris rufus</i>	Rufous Treecreeper	Climacteridae	N	Terrestrial	Predator	LC
<i>Cormobates leucophaea</i>	White-throated Treecreeper	Climacteridae	N	Terrestrial	Predator	LC
<i>Chalcophaps longirostris</i>	Brown-capped Emerald-Dove	Columbidae	N	Terrestrial	Omnivore	LC
<i>Columba leucomela</i>	White-headed Pigeon	Columbidae	N	Terrestrial	Omnivore	LC
<i>Columba livia</i>	Rock Dove	Columbidae	Y	Terrestrial	Plant-based diet	LC
<i>Ducula spilorrhoa</i>	Torresian Imperial-Pigeon	Columbidae	Y	Terrestrial	Omnivore	LC
<i>Ducula whartoni</i>	Christmas Island Imperial-Pigeon	Columbidae	Y	Terrestrial	Omnivore	LC
<i>Geopelia cuneata</i>	Diamond Dove	Columbidae	N	Terrestrial	Plant-based diet	LC
<i>Geopelia humeralis</i>	Bar-shouldered Dove	Columbidae	N	Terrestrial	Plant-based diet	LC
<i>Geopelia placida</i>	Peaceful Dove	Columbidae	N	Terrestrial	Plant-based diet	LC
<i>Geophaps plumifera</i>	Spinifex Pigeon	Columbidae	N	Terrestrial	Plant-based diet	LC
<i>Geophaps scripta</i>	Squatter Pigeon	Columbidae	N	Terrestrial	Plant-based diet	LC

<i>Geophaps smithii</i>	Partridge Pigeon	Columbidae	N	Terrestrial	Plant-based diet	LC
<i>Leucosarcia melanoleuca</i>	Wonga Pigeon	Columbidae	N	Terrestrial	Omnivore	LC
<i>Lopholaimus antarcticus</i>	Topknot Pigeon	Columbidae	N	Terrestrial	Omnivore	LC
<i>Macropygia phasianella</i>	Brown Cuckoo-Dove	Columbidae	N	Terrestrial	Plant-based diet	LC
<i>Megaloprepia magnifica</i>	Wompoo Fruit-Dove	Columbidae	N	Terrestrial	Omnivore	LC
<i>Ocyphaps lophotes</i>	Crested Pigeon	Columbidae	Y	Terrestrial	Omnivore	LC
<i>Petrophassa albipennis</i>	White-quilled Rock-Pigeon	Columbidae	N	Terrestrial	Plant-based diet	LC
<i>Phaps chalcoptera</i>	Common Bronzewing	Columbidae	N	Terrestrial	Plant-based diet	LC
<i>Phaps elegans</i>	Brush Bronzewing	Columbidae	N	Terrestrial	Plant-based diet	LC
<i>Phaps histrionica</i>	Flock Bronzewing	Columbidae	Y	Terrestrial	Plant-based diet	LC
<i>Ptilinopus regina</i>	Rose-crowned Fruit-Dove	Columbidae	N	Terrestrial	Omnivore	LC
<i>Ptilinopus superbus</i>	Superb Fruit-Dove	Columbidae	N	Terrestrial	Omnivore	LC
<i>Spilopelia chinensis</i>	Spotted Dove	Columbidae	N	Terrestrial	Plant-based diet	LC
<i>Spilopelia senegalensis</i>	Laughing Dove	Columbidae	N	Terrestrial	Plant-based diet	LC
<i>Eurystomus orientalis</i>	Oriental Dollarbird	Coraciidae	N	Terrestrial	Predator	LC
<i>Corvus bennetti</i>	Little Crow	Corvidae	Y	Terrestrial	Omnivore	LC
<i>Corvus coronoides</i>	Australian Raven	Corvidae	N	Terrestrial	Omnivore	LC
<i>Corvus mellori</i>	Little Raven	Corvidae	N	Terrestrial	Omnivore	LC
<i>Corvus orru</i>	Torresian Crow	Corvidae	Y	Terrestrial	Omnivore	LC
<i>Corvus tasmanicus</i>	Forest Raven	Corvidae	N	Terrestrial	Omnivore	LC
<i>Cacomantis castaneiventris</i>	Chestnut-breasted Cuckoo	Cuculidae	N	Terrestrial	Predator	LC
<i>Cacomantis flabelliformis</i>	Fan-tailed Cuckoo	Cuculidae	N	Terrestrial	Predator	LC
<i>Cacomantis variolosus</i>	Brush Cuckoo	Cuculidae	N	Terrestrial	Predator	LC
<i>Centropus phasianinus</i>	Pheasant Coucal	Cuculidae	N	Terrestrial	Predator	LC

<i>Chalcites basalis</i>	Horsfield's Bronze-Cuckoo	Cuculidae	N	Terrestrial	Predator	LC
<i>Chalcites lucidus</i>	Shining Bronze-Cuckoo	Cuculidae	N	Terrestrial	Predator	LC
<i>Chalcites minutillus</i>	Little Bronze-Cuckoo	Cuculidae	N	Terrestrial	Predator	LC
<i>Chalcites osculans</i>	Black-eared Cuckoo	Cuculidae	N	Terrestrial	Predator	LC
<i>Eudynamys orientalis</i>	Eastern Koel	Cuculidae	N	Terrestrial	Omnivore	LC
<i>Heteroscenes pallidus</i>	Pallid Cuckoo	Cuculidae	N	Terrestrial	Predator	LC
<i>Scythrops novaehollandiae</i>	Channel-billed Cuckoo	Cuculidae	N	Terrestrial	Omnivore	LC
<i>Cuculus optatus</i>	Oriental Cuckoo	Cuculidae	N	Terrestrial	Predator	LC
<i>Dicaeum hirundinaceum</i>	Mistletoebird	Dicaeidae	N	Terrestrial	Omnivore	LC
<i>Dicrurus bracteatus</i>	Spangled Drongo	Dicruridae	N	Terrestrial	Omnivore	LC
<i>Diomedea antipodensis</i>	Antipodean Albatross	Diomedeidae	Y	Marine/Coastal	Predator	EN
<i>Diomedea exulans</i>	Wandering Albatross	Diomedeidae	Y	Marine/Coastal	Predator	VU
<i>Thalassarche bulleri</i>	Buller's Albatross	Diomedeidae	Y	Marine/Coastal	Predator	NT
<i>Thalassarche carteri</i>	Indian Yellow-nosed Albatross	Diomedeidae	Y	Marine/Coastal	Predator	EN
<i>Thalassarche cauta</i>	Shy Albatross	Diomedeidae	Y	Marine/Coastal	Predator	NT
<i>Thalassarche melanophrys</i>	Black-browed Albatross	Diomedeidae	Y	Marine/Coastal	Predator	LC
<i>Chloebia gouldiae</i>	Gouldian Finch	Estrildidae	Y	Terrestrial	Plant-based diet	LC
<i>Emblema pictum</i>	Painted Finch	Estrildidae	N	Terrestrial	Plant-based diet	LC
<i>Heteromunia pectoralis</i>	Pictorella Mannikin	Estrildidae	N	Terrestrial	Plant-based diet	LC
<i>Lonchura castaneothorax</i>	Chestnut-breasted Mannikin	Estrildidae	N	Terrestrial	Plant-based diet	LC
<i>Lonchura flavigrymnna</i>	Yellow-rumped Mannikin	Estrildidae	Y	Terrestrial	Plant-based diet	LC
<i>Lonchura punctulata</i>	Nutmeg Mannikin	Estrildidae	Y	Terrestrial	Plant-based diet	LC
<i>Neochmia modesta</i>	Plum-headed Finch	Estrildidae	Y	Terrestrial	Plant-based diet	LC

<i>Neochmia phaeton</i>	Black-bellied Crimson Finch	Estrildidae	N	Terrestrial	Plant-based diet	LC
<i>Neochmia ruficauda</i>	Star Finch	Estrildidae	Y	Freshwater	Omnivore	LC
<i>Neochmia temporalis</i>	Red-browed Finch	Estrildidae	Y	Terrestrial	Plant-based diet	LC
<i>Poephila acuticauda</i>	Long-tailed Finch	Estrildidae	Y	Terrestrial	Plant-based diet	LC
<i>Poephila cincta</i>	Black-throated Finch	Estrildidae	N	Terrestrial	Plant-based diet	LC
<i>Poephila personata</i>	Masked Finch	Estrildidae	Y	Terrestrial	Omnivore	LC
<i>Stagonopleura bella</i>	Beautiful Firetail	Estrildidae	N	Terrestrial	Omnivore	LC
<i>Stagonopleura guttata</i>	Diamond Firetail	Estrildidae	Y	Terrestrial	Plant-based diet	VU
<i>Stagonopleura oculata</i>	Red-eared Firetail	Estrildidae	N	Terrestrial	Omnivore	LC
<i>Taeniopygia bichenovii</i>	Double-barred Finch	Estrildidae	N	Terrestrial	Plant-based diet	LC
<i>Taeniopygia castanotis</i>	Zebra Finch	Estrildidae	Y	Terrestrial	Plant-based diet	LC
<i>Falco berigora</i>	Brown Falcon	Falconidae	N	Terrestrial	Predator	LC
<i>Falco cenchroides</i>	Nankeen Kestrel	Falconidae	N	Terrestrial	Predator	LC
<i>Falco hypoleucus</i>	Grey Falcon	Falconidae	N	Terrestrial	Predator	VU
<i>Falco longipennis</i>	Australian Hobby	Falconidae	N	Terrestrial	Predator	LC
<i>Falco peregrinus</i>	Peregrine Falcon	Falconidae	N	Terrestrial	Predator	LC
<i>Falco subniger</i>	Black Falcon	Falconidae	N	Terrestrial	Predator	LC
<i>Fregata andrewsi</i>	Christmas Island Frigatebird	Fregatidae	Y	Marine/Coastal	Predator	VU
<i>Fregata ariel</i>	Lesser Frigatebird	Fregatidae	Y	Marine/Coastal	Predator	LC
<i>Fregata minor</i>	Great Frigatebird	Fregatidae	Y	Marine/Coastal	Predator	LC
<i>Carduelis carduelis</i>	European Goldfinch	Fringillidae	N	Terrestrial	Plant-based diet	LC
<i>Chloris chloris</i>	Common Greenfinch	Fringillidae	N	Terrestrial	Plant-based diet	LC
<i>Glareola maldivarum</i>	Oriental Pratincole	Glareolidae	Y	Terrestrial	Predator	LC
<i>Stiltia isabella</i>	Australian Pratincole	Glareolidae	Y	Terrestrial	Predator	LC
<i>Grus antigone</i>	Sarus Crane	Gruidae	N	Terrestrial	Omnivore	VU
<i>Grus rubicunda</i>	Brolga	Gruidae	N	Terrestrial	Omnivore	LC

<i>Haematopus fuliginosus</i>	Sooty Oystercatcher	Haematopodidae	Y	Marine/Coastal	Predator	LC
<i>Haematopus longirostris</i>	Australian Pied Oystercatcher	Haematopodidae	Y	Marine/Coastal	Predator	LC
<i>Cheramoeca leucosterna</i>	White-backed Swallow	Hirundinidae	N	Terrestrial	Predator	LC
<i>Hirundo neoxena</i>	Welcome Swallow	Hirundinidae	Y	Freshwater	Predator	LC
<i>Petrochelidon ariel</i>	Fairy Martin	Hirundinidae	Y	Freshwater	Predator	LC
<i>Petrochelidon nigricans</i>	Tree Martin	Hirundinidae	Y	Terrestrial	Predator	LC
<i>Irediparra gallinacea</i>	Comb-crested Jacana	Jacanidae	Y	Freshwater	Predator	LC
<i>Anous minutus</i>	Black Noddy	Laridae	Y	Marine/Coastal	Predator	LC
<i>Anous stolidus</i>	Brown Noddy	Laridae	Y	Marine/Coastal	Predator	LC
<i>Chlidonias hybrida</i>	Whiskered Tern	Laridae	Y	Freshwater	Predator	LC
<i>Chlidonias leucopterus</i>	White-winged Black Tern	Laridae	Y	Freshwater	Predator	LC
<i>Gelochelidon macrotarsa</i>	Australian Gull-billed Tern	Laridae	Y	Marine/Coastal	Predator	LC
<i>Gelochelidon nilotica</i>	Common Gull-billed Tern	Laridae	Y	Marine/Coastal	Predator	LC

603

604

605 *Table S3. Predicted HPAI H5N1 susceptibility of Australian bird families, as indicated by*
 606 *the predicted number of HPAI notifications. Because we used a null, phylogeny-only*
 607 *model with a family-level phylogeny to make predictions, the predictions do not vary*
 608 *with species within families. Families with a * denote families not represented in the*
 609 *WAHIS database (either because they are Australian endemics or because they lack*
 610 *detection/reporting of HPAI), for whom our certainty in our predictions might be lower*
 611 *(such as Anhingidae – see discussion). Table is arranged from most to least susceptible.*

Family	Predicted notifications
Sulidae	78
Anhingidae *	54
Laridae	51
Anatidae	48
